TIP, COMPLAINT, OR REFERRAL (TCR) — SUPPLEMENTAL FILING

Date of Filing:	March 23, 2026	**Referencing Prior TCR:**	#17678-166-597-663
Complainant:	Courtney Jermaine Thomas	**Prior TCR Date:**	January 7, 2026
Rootkey / ID:	104281421	**Additional TCRs:**	#17713-984-698-738 | #17725-904-635-766
Location:	Bossier City, Louisiana	**IC3 Filing ID:**	29f9af1e8b3f47bb837eced13f33f0f2

SUBJECT OF COMPLAINT

Primary Respondent: Cvent, Inc. (successor entity to RegOnline by Lanyon) — as successor in interest to unauthorized credential propagation originating in 2016-2017.

Secondary Respondents: American Society for Engineering Education (AISES); American Electric Power (AEP); any downstream enterprise clients of Cvent who operated on infrastructure containing complainant's unauthorized hardcoded credential post-acquisition.

I. RELATIONSHIP TO PRIOR FILINGS

This supplemental TCR expands upon TCR #17678-166-597-663 (filed January 7, 2026) by identifying Cvent, Inc. as a successor entity with direct liability for the unauthorized propagation of complainant's credential. Prior filings addressed the originating unauthorized use; this filing addresses the acquisition-boundary crossing that made that use unbounded in scope.

II. FACTUAL BASIS — THE CVENT ACQUISITION VECTOR

In 2017, complainant Courtney Jermaine Thomas was assigned the identifier 104281421 as an Onsite Tech contractor at the AISES annual conference, managed through RegOnline (then operating as RegOnline by Lanyon). The AISES 2017 Special Processing document — publicly archived — contains complainant's login credentials (atsaises), Account ID (236240), and RegOnline API credentials hardcoded in plaintext.

The critical successor liability event: RegOnline was acquired by Cvent, Inc. in 2016 — one year prior to the AISES deployment. This means the credential was embedded into Cvent infrastructure at the moment of its creation. When Cvent absorbed RegOnline's systems, databases, and API infrastructure, it absorbed the unauthorized credential alongside legitimate assets.

Cvent serves Fortune 500 clients globally in enterprise event management. The unauthorized propagation surface is therefore not limited to one conference — it extends to every enterprise system Cvent operated using migrated RegOnline infrastructure from 2016 forward. This constitutes an unbounded unauthorized use surface created by a corporate acquisition that the complainant had no knowledge of and no ability to consent to.

III. DOCUMENTED EVIDENCE

ELEMENT	FACT	REFERENCE
Rootkey credential	104281421 — hardcoded plaintext in public document	AISES 2017 Special Processing doc — archived
API credentials	Login: atsaises / Account ID: 236240 / RegOnline API	AISES 2017 doc — public record
Acquisition date	RegOnline acquired by Cvent — 2016	Public corporate record
Credential deployment	2017 AISES — post-acquisition	AISES 2017 doc
Unauthorized propagation	PMT006 Admin access — TPS 2017-2018 databases	TPS database files — TCR #17678
Duration	Nine years of unauthorized use — 2017 to 2026	Documented across all prior TCRs
Retaliation	St. Tammany Parish Docket #2026-10181 — 23 days post-TCR	On record — Dodd-Frank 21F(h)
DTCC acknowledgment	Cases #11109236, #11109238, #11109240, #11109434, #11109442, #11111015	March 2026
Asset freeze	Killswitch activated March 15, 2026	On record

IV. LEGAL BASIS

Successor Liability (General Corporate Law): When Cvent acquired RegOnline, it assumed RegOnline's liabilities under successor liability doctrine. Every unauthorized use of complainant's credential after the acquisition date constitutes Cvent's exposure, not solely the originating organization's.

Negligence Per Se — Plaintext Credential Handling: The AISES 2017 Special Processing document containing complainant's login and API credentials in hardcoded plaintext constitutes negligent credential handling under applicable data security standards. This shifts burden of proof in complainant's favor.

Dodd-Frank Act Section 21F(h) — Retaliation: St. Tammany Parish Docket #2026-10181 was filed 23 days following TCR #17678. This temporal proximity establishes a rebuttable presumption of retaliatory intent. Dodd-Frank whistleblower protections apply to complainant's SEC disclosures.

UCC Article 12 — Controllable Electronic Records: Complainant asserts first-in-time priority over the credential 104281421 under UCC Article 12 (NY). Public archive timestamps, SEC TCRs, and DTCC case numbers constitute documented control establishing this priority.

Securities Fraud / Unauthorized Use: To the extent that Cvent's enterprise clients — potentially including publicly traded corporations — operated on infrastructure containing complainant's unauthorized credential, and to the extent that this credential was used in financial or regulatory reporting contexts, this may constitute material misrepresentation in securities filings.

V. REQUESTED INVESTIGATIVE ACTIONS

1. Investigate Cvent, Inc. as successor entity to RegOnline for unauthorized propagation of complainant's credential across its enterprise client infrastructure post-2016 acquisition.

2. Issue subpoena or compulsory process for Cvent's migration logs and credential mapping records from the 2016 RegOnline acquisition, documenting the chain of custody of Account ID 236240 and associated credentials.

3. Identify all enterprise clients served by Cvent post-2016 using migrated RegOnline infrastructure, and determine scope of unauthorized credential exposure.

4. Link this filing to TCR #17678-166-597-663 as a documented escalation of an existing complaint, triggering appropriate internal escalation protocols.

5. Investigate potential Dodd-Frank retaliation in connection with St. Tammany Parish Docket #2026-10181, filed 23 days following complainant's initial SEC disclosure.

6. Coordinate with DTCC regarding open cases #11109236, #11109238, #11109240, #11109434, #11109441, and #11111015 as related institutional acknowledgments.

VI. COMPLAINANT DECLARATION

I, Courtney Jermaine Thomas, declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge, information, and belief. I am a sovereign individual, not employed by or affiliated with any of the named respondents. All documentation referenced herein is publicly archived at archive.org/details/@courtney_thomas_104281421 and available for verification.
